

The Studio of Handcrafts Loom is built in the traditional style—a heritage your grandchildren will appreciate. However, all components of the loom were engineered for proper balance, long wear, ease of operation and adaptability for advanced weaving techniques.

The Studio of Handcrafts Loom is constructed of red oak with hand rubbed oil finish.

It is a jack type loom with floating lamms which lift the harnesses from the sides. Weaving a width of one inch or full width of the loom can be done with ease and the assurance of a wide shed.

All looms are made to accommodate eight harnesses so that a four harness loom may have additional harnesses added at any time. Additional treadles can also be added. A 32" loom can have up to 10 treadles and a 46" loom up to 14 treadles.

All looms have friction brakes. Standard on all looms is a 12" circumference warp beam. A yard beam or yard sectional beam is available. The sectional beam has metal pins on 2" centers which can be turned to the inside for a chain warp. Also, a second or supplementary warp beam can be added. You won't outgrow this loom.

The ease of the treadle tie-up is a feature everyone greatly appreciates. The patented lamm to treadle connectors need only be threaded into the right holes.

The breast beam and the entire beater assembly just lift off and are out of the way for threading.

All of the harnesses slide out of the castle grooves with nothing to detach. The heddles can easily be shifted without using tools or opening hooks.

You will thoroughly enjoy and appreciate the smooth, quiet, dependable operation of this remarkable loom.

Many experienced weavers have changed from their former looms to the Studio of Handcrafts Loom for the ultimate fulfillment weaving can afford. Weave narrow bands or wide hangings or yardage. Be creative on a Studio of Handcrafts Loom.

STANDARD FEATURES OF STUDIO OF HANDCRAFTS LOOMS

Heddles—10 to 1"
 Reed—1-10 dent
 12" Circumference warp beam
 Friction brake on warp beam
 Small increment ratchet on cloth beam
 6 treadles for 4 harnesses
